

Max Andrés Zertuche Pérez

SOFTWARE DEVELOPER

I'm a software developer with two years of experience creating efficient solutions. I stand out for my ability to learn quickly and my self-directed approach to acquiring new technologies, which allows me to adapt to projects and teams quickly.

EDUCATION BACHELOR IN MULTIMEDIA Y ANIMACIÓN DIGITAL

Universidad Autónoma de Nuevo León
August 2021 - December 2025

PROFESSIONAL EXPERIENCE SOFTWARE DEVELOPER - OVERCLOCKERS MÉXICO SEPTEMBER 2025 - PRESENT

- Engineered **intelligent automation workflows** using **Python** scripting to streamline critical **business processes** and facilitate the integration of **data-driven solutions**.
- Implemented **AI-driven analytics** utilizing **SAS** software to process complex **enterprise datasets**, extract actionable insights, and **optimize** business **decision-making**.
- Orchestrated the deployment of **scalable automation services** and **containerized environments** for data pipelines using **Docker** and **Docker Compose**.
- Administration of Ubuntu Linux servers via **SSH**, managing scheduled tasks (**cron jobs**) and data encryption with **LUKS**.
- Designed and optimized **T-SQL**, **MySQL** and **PostgreSQL** queries to accelerate ETL processes.

GAMEPLAY DEVELOPER - AMBER MÉXICO JUNE 2025 - DECEMBER 2025

- Implemented boss **AI** through state machines and behavior trees.
- Implemented **gamification** systems, designing mechanics that encouraged user retention.

FULLSTACK DEVELOPER - COLEGIO SAN PEDRO DE IDIOMAS NOVEMBER 2024 - JUNE 2025

- Implemented and managed a complete **Google Cloud web solution** managing data with the **Firebase Storage** suite.
- Developed a **CRM** for students and staff to optimize student and staff data management.

RELATED PROJECTS INTELLIGENT ACCESSIBILITY APPLICATION | CSC IOS HACKATHON WINNER MAY 2025

- Developed an iOS accessibility application utilizing Swift, **Core ML**, and the **Vision framework** to deliver live camera **object detection** for the 2026 World Cup.
- Prepared and managed custom machine learning training data, utilizing **Make Sense AI** and **Jupyter Notebooks** to convert bounding box dataset annotations into structured JSON formats.

EXOPLANET PREDICTION & VISUALIZATION TOOL | NASA SPACE APPS CHALLENGE NOVEMBER 2025

- Won the MLH Challenge for the **best** Google Gemini API **implementation**.
- Engineered an application integrating the **Gemini API** and **Hugging Face API** to analyze astronomical data and generate **accessible explanations** for **exoplanet predictions**.
- Implemented **dynamic generation pipelines** to render accurate planetary visuals based on **predictive machine learning models**.

SOFT SKILLS Proactive mindset, Anticipating challenges, Critical thinking, Problem solving, Adaptability, Perseverance.

TECHNICAL KNOWLEDGE

LANGUAGES • Spanish | Native • English | C1 TOEFL
